

What was your general reaction to the two San Francisco Chronicle articles regarding the "Applications and Ethics of DNA Analysis"? Do you think the uses of DNA analysis in these cases was right or ethical? How would you feel if someone you did not know approached you and said that they had found you (for whatever reason) through a DNA database?

Please answer all of the questions above in the form of a 1-2 page, typed, double-spaced paper submitted on Canvas as a Word document or PDF by 6 PM on Sunday, February 19. **You need to discuss BOTH of the articles, and you need to refer to specific information from the articles in your paper.** You should write in complete sentences with correct spelling, grammar, and punctuation, and I will be looking for evidence that you understand the topic of DNA and were able to apply your understanding to these articles. You will need to share your answers in next week's discussion.

If you have any questions or problems with this assignment please contact me **BEFORE** the Sunday deadline.
